

- Grower/Farm Name
- GB Account
- Contact information with phone and mailing address
- PCA
- Coalition name
- Coalition Member ID(s)
- County where fields are located
- APN(s)
- Acreage
- Crop Type (specify stone fruit: peach or nectarine; grape: raisin, table, or wine; citrus: lemon, orange, or mandarin)
- Crop age of Perennials
- Nitrogen use in pounds per acre per crop (synthetic and compost)
- Actual Harvest Yield and production unit
  - If boxes, bins, crates, cartons (anything other than pounds and tons), weight of container is needed (box can be 12# and 25#)
  - If no yield is determined, need reason why (i.e. no yield on cherries due to chill hours/freeze); enter NY
  - If Non-bearing, need reason: age of crop such as 1st-4th leaf almonds, 2-year-old citrus; enter NB
    - Obtain age of crop if this is the case
    - 5th leaf almond is typical age to produce
- Irrigation Methods
- Irrigation Efficiency Practices
- Nitrogen Efficiency Practices
